## 2017-18 Evaluation of

## Accelerating Campus Excellence (ACE)

## Project Evaluators: Dianne K. Palladino Ph.D. and Mitch Barton, Ph.D.

#### Abstract

The Accelerating Campus Excellence (ACE) initiative formed in 2015-16 on the principle that transforming schools requires strong leadership and effective teachers enveloped in an environment of high expectations. Supported by $\$ 9,885,862$ in general operating funds, the 2017-18 ACE program added a second cohort of six campuses (ACE 2.0) to the original seven-campus cohort (ACE 1.0). The ACE program aimed to improve student achievement by accelerating growth in three areas: people, learning, and expectations. This evaluation reports 2017-18 progress toward outcomes related to these areas. Highlights of findings include: People. Three ACE 1.0 campuses exceeded the district teacher retention rate ( $73 \%$ ). Nine ACE campuses and ACE overall employed a minimum of 60 percent of teachers with at least a Proficient I Teacher Excellence Initiative effectiveness level. The rate of teachers with proficient average spot observation ratings varied by campus. Five ACE campuses earned fourth or fifth quintile (most positive) scores on the Culture of Feedback and Support section of the Climate Survey. Learning. Overall rates of kindergarten to grade two ACE students reading on grade level trended upward in 2017-18 as assessed by Istation Indicators of Progress, and ACE students reading on grade level either closed the gap with district rates or exceeded the district by year end. ACE students overall achieved Assessment of Course Performance (ACP) passing rates within 10 percentage points of district rates on $38(78 \%)$ of 49 ACPs in the fall and on three (38\%) of eight spring exams. ACE students overall achieved scores at all State of Texas Assessments of Academic Readiness performance standards at rates at least within 10 percentage points of the district in all subjects, and exceeded district one-, two-, and three-year growth rates in most subjects. Expectations. ACE 1.0 campuses reduced disciplinary referrals by 3,391 ( $87 \%$ ) over three years, and ACE 2.0 campuses reduced referrals by 1,218 ( $77 \%$ ) in 2017-18. Overall ACE attendance rates were comparable to district rates ( $95 \%$ ). ACE student and parent perceptions were generally positive. Overall. Twelve of the 13 ACE campuses earned a Met Standard state accountability rating in 2017-18. Primary recommendations were offered regarding: 1) monitoring of transitioning campuses, 2) support and development of campus leaders and teachers, 3) heightened literacy focus, 4) emphasis on behavioral management and parent involvement, and 5) plans for long-term outcome evaluation.

## PROGRAM DESCRIPTION

The Accelerating Campus Excellence (ACE) initiative was formed in the Dallas Independent School District (Dallas ISD) on the principle that transforming schools requires strong leadership and effective teachers enveloped in an environment of high expectations for students and staff members. Starting in 2015-16, ACE offered competitive stipends to incentivize top teachers and principals to relocate to some of the district's most challenged campuses. The first group of campuses (ACE 1.0) continued for year three of the program in 2017-18 and includes four elementary schools (Annie Web Blanton, Umphrey Lee, Roger Q. Mills, and Elisha M. Pease) and three middle schools (Billy Earl Dade, Thomas A. Edison, and Sarah Zumwalt). Six of the seven ACE 1.0 campuses were removed from Texas Improvement Required status after the first year of the program and continued to meet standards after year two. A new cohort of ACE campuses (ACE 2.0) participated for their first year in the program in 2017-18 and included five elementary schools (C.F. Carr, J.N. Ervin, Onesimo Hernandez, L.W. Ray, and Edward Titche) and one middle school (Thomas J. Rusk).

The ACE program aimed to improve student achievement by striving to accelerate growth in three general areas: people, learning, and expectations.

## People

To accelerate factors related to people, ACE campuses were staffed with strong principals and effective teachers. Staff members also embraced three core values: 1) growth mindset, 2) high expectations, and 3 ) inspiring relationships. The following objectives measured progress in this area:

- Recruit, retain, and develop strong teachers as measured by:
- Annual teacher retention rates at or above district retention rates
- A minimum of $60 \%$ of teachers at ACE campuses with Proficient I or above TEI effectiveness levels
- High percentage (fall: $60 \%$; spring: $75 \%$ ) of proficient teachers as measured by average TEI spot observation scores on standards 2.3 (clear instruction) and 2.4 (instructional rigor)
- Fourth or fifth quintile scores on the Culture of Feedback and Support section of the district Climate Survey

## Learning

To accelerate factors related to learning, ACE staff members participated in supplemental professional development opportunities and committed to excellence in both academic and social-emotional learning. Staff members also focused on consistent use of data-driven instruction. Finally, the school day was extended one hour on ACE campuses, and extended after school opportunities were offered until 6 p.m. two to three days per week. ${ }^{1}$ The following objectives measured progress in this area:

[^0]- Improve rates of kindergarten to grade two students reading on grade level as measured by Istation Indicators of Progress (ISIP; i.e., rates of Tier 1 students at or above district rates)
- Close achievement gap in assessment scores (i.e., Assessment of Course Performance passing rates and State of Texas Assessments of Academic Readiness performance standard attainment rates within ten percentage points or exceeding the district)

## Expectations

To accelerate factors related to expectations, ACE campuses emphasized relationships among campus community members. In addition, core content was double blocked and taught in alignment with best practices. The ACE program also provided uniforms to students, upgraded campus facilities, and strengthened parent and community partnerships. The following objectives measured progress in this area:

- Increase positive student expectations and culture as measured by:
- Disciplinary offenses at or below district rates
- Attendance rates at or above $96 \%$
- Student Experience Survey positive response rates at or above district averages
- Parent/Guardian Survey positive response rates at or above district averages

## Priorities

To support acceleration in the three areas, ACE campuses prioritized balanced literacy, social and emotional development, and professional learning communities (PLCs) with strong data practices.

## PURPOSE AND SCOPE OF THE EVALUATION

The purpose of this report was to provide data for campus, program, and district leadership to evaluate progress toward year three objectives established by ACE leadership, and to provide analysis of some additional applicable outcomes. When possible, data were provided on the campus level, for ACE 1.0, ACE 2.0, and ACE overall, and for comparison groups, including Intensive Support Network (ISN; See Appendix A) campuses and the district. Unless otherwise specified, outcomes were analyzed using data for students who were enrolled on the PEIMS reporting date for the specified year. Information was grouped into several main categories, including:

- ACE program funding information
- ACE staff member selection and compensation
- Characteristics of ACE students, teachers, and principals
- Perceptions of ACE teachers and administrators
- Outcomes related to the people, learning, and expectations components of ACE
- 2018 ACE campus accountability results
- Actionable program recommendations

## MAJOR EVALUATION QUESTIONS AND RESULTS

## What was the source and amount of funding for the ACE program?

## Methodology

ACE program leadership provided budget and funding source information.

## Results

The total budget for the 2017-18 ACE program was $\$ 9,885,862$. This budget was supported by general operating funds from the Dallas ISD. The budget included $\$ 8,551,886$ for additional personnel and teacher stipends, $\$ 384,578$ for transportation costs, $\$ 217,230$ for uniforms, and $\$ 732,168$ for professional development and extra duty pay.

## How were ACE staff members selected and compensated?

## Methodology

Information about the 2017-18 ACE program originated from interviews with ACE program leadership and from inspection of program documentation.

## Results

The cornerstone of the ACE program was recruiting highly effective teachers and leadership teams to work at ACE campuses. At least 85 percent of staff members at new ACE campuses were replaced prior to year one of implementation. This reconstitution started with the selection of strong, proven leadership, followed by recruitment of proven highly effective teachers and support staff from throughout the district. Individuals selected to work in these roles on ACE campuses were awarded stipends at milestones throughout the year. Stipend amounts depended upon position, and, in the case of teachers, on TEI effectiveness ratings. Table 1 shows stipends and distribution times by role.

## Table 1: 2017-18 ACE Stipends and Payout Schedule

|  | ACE Stipend <br> (Total) | Payout \#1 <br> Signing Bonus <br> (September) | Payout \#2 <br> (December) | Payout \#3 <br> (May) |
| :--- | :---: | :---: | :---: | :---: |
| Principal | $\$ 15,000$ | $\$ 2,000$ | $\$ 6,500$ | $\$ 6,500$ |
| Assistant Principal | $\$ 13,500$ | $\$ 2,000$ | $\$ 5,750$ | $\$ 5,750$ |
| Counselor | $\$ 10,000$ | $\$ 2,000$ | $\$ 4,000$ | $\$ 4,000$ |
| Instructional Coach | $\$ 8,000$ | $\$ 2,000$ | $\$ 3,000$ | $\$ 3,000$ |
| Media Specialist | $\$ 8,000$ | $\$ 2,000$ | $\$ 3,000$ | $\$ 3,000$ |
| Teacher (Distinguished) | $\$ 12,000$ | $\$ 2,000$ | $\$ 5,000$ | $\$ 5,000$ |
| Teacher (Proficient) | $\$ 10,000$ | $\$ 2,000$ | $\$ 4,000$ | $\$ 4,000$ |
| Teacher (Progressing) | $\$ 8,000$ | $\$ 2,000$ | $\$ 3,000$ | $\$ 3,000$ |

Source: ACE program office.

For every 300 students, ACE campuses received an additional assistant principal, counselor, and campus instructional coach. Class size was maintained at 22 students or fewer at elementary schools.

## What were the characteristics of ACE campuses?

This section reports the demographic characteristics of ACE students, teachers, and principals.

## Methodology

To determine ACE student characteristics, the evaluator used demographic data from district files for students enrolled on the PEIMS reporting date of October 27, 2017. The evaluator conducted frequency and crosstab analyses to summarize student demographic information by campus, for ACE 1.0, ACE 2.0, ACE overall, and by sex, ethnicity, and special student group.

For ACE teacher and principal characteristics, the evaluator used the district personnel file dated December 13, 2017 to summarize demographics for active teachers by sex, ethnicity, highest earned degree, and years in the district. The evaluator conducted frequency and crosstab analyses to summarize demographic information by campus, ACE 1.0, ACE 2.0, and ACE overall.

## Results

## Students

Table 2 summarizes student characteristics for ACE 1.0, ACE 2.0, and for ACE overall with regard to sex, ethnicity, and special student groups. Student demographic information by campus and by grade level are provided in Appendix B. Over half of ACE students were male ( $51 \%$ ) and/or African American (54\%), and most were economically disadvantaged (86\%). Almost a third were English language learners (ELLs; 32\%), and 10 percent were enrolled in special education (SPED). Student characteristics were comparable for ACE 1.0 and ACE 2.0 campuses.

Table 2: 2017-18 ACE Student Demographics

Source: District demographic data from October 27, 2017 (PEIMS snapshot date).
Note: Af Amer = African American. Eco Dis = economically disadvantaged. ELL = English language learner. SPED = special education.

## Teachers

Table 3 summarizes teacher characteristics for ACE 1.0, ACE 2.0, and for ACE overall with regard to sex, ethnicity, highest degree earned, and years in district. Teacher characteristics by campus are provided in Appendix C. The 462 teachers on ACE campuses were 76 percent female, 58 percent African American, 23 percent Hispanic, and 16 percent white. Almost a third (29\%) of ACE teachers held at least a master's degree. ACE teachers had been employed in the Dallas ISD for an average of 7.5 years, with 46 percent teaching in the Dallas ISD for six or more years. Rates of male, Hispanic, and White teachers were higher at ACE 2.0 campuses than at ACE 1.0 campuses, and rates of African American teachers were lower at ACE 2.0 campuses than at ACE 1.0 campuses. Degrees earned and district tenure were similar, on average, for ACE 1.0 and ACE 2.0 campuses.

Table 3: 2017-18 ACE Teacher Demographics

|  | $\begin{aligned} & \text { ACE } 1.0 \\ & (N=255) \end{aligned}$ |  | $\begin{gathered} \text { ACE } 2.0 \\ (N=207) \end{gathered}$ |  | $\begin{aligned} & \text { All ACE } \\ & (N=462) \end{aligned}$ |  |

Note: Af Amer = African American. Percentages may not sum to 100 because of rounding.

## Principals

The 13 ACE principals ${ }^{2}$ were 54 percent female, 69 percent African American, and 23 percent Hispanic. Most principals held at least a master's degree (85\%). ACE principals had been employed in the

[^1]Dallas ISD for an average of 11.8 years, with 46 percent employed by the district for 15 or more years and 77 percent employed by the district for at least five years. Assigned principals on ACE campuses remained consistent throughout the academic year.

## What were teacher and campus leadership perceptions of ACE?

The evaluator collected and summarized feedback from ACE teachers and campus administrators regarding several topics: 1) successes and challenges, 2) parent and community partnerships, and 3) compensation and future directions.

## Methodology

Incorporating input from ACE program leadership, the evaluator administered an online survey to ACE teachers $(N=456)^{3}$ and another survey to ACE campus administrators (principals and assistant principals; $N=41$ ) to collect perceptions of the ACE program. Potential participants of both surveys received email invitations to complete the survey on March 5, 2018, and the survey remained open until March 30, 2018, with periodic reminders sent to those who were yet to respond. The evaluator conducted frequency analyses on responses to survey items answered on a ratings scale ${ }^{4}$ and content analyzed open-ended question responses, grouping feedback into general themes.

## Results

## Campus Leadership

Detailed principal and assistant principal survey responses are included in Appendix D. Highlights are included in this section for brevity. Overall, of the 41 campus administrators who received survey invitations, 32 ( $78 \%$ ) at least partially completed the survey. ${ }^{5}$ Because of the small number of principals and assistant principals per campus, survey responses were reviewed in aggregate rather than grouped by campus or role to support respondent confidentiality.

Participant characteristics. Respondents were 38 percent principals and 63 percent assistant principals. Half of respondents continued employment at the same ACE campus as the previous year, and most ( $88 \%$ ) worked as a principal or assistant principal in the previous year. ${ }^{6}$ Half of principal respondents had at least four years of campus leadership experience, and most ( $91 \%$ ) had served at least one year as a teacher in the past.

Successes and Challenges. As shown in Figure 1, at least half of administrator respondents felt that five key factors were implemented extremely or very effectively on their campuses. They most highly

[^2]rated the effectiveness of data analysis and PLC (84\%), and consistency of policies/systems/structures for student culture ( $80 \%$ ).

Figure 1: 2017-18 ACE Campus Administrator Survey, Implementation Effectiveness

> How effectively were the following factors implemented at your ACE campus this year?

Source: 2017-18 ACE Campus Administrator Survey.
Note: Campus administrators include principals and assistant principals. Percentages do not include respondents who indicated that a question was not applicable or they did not know or were not sure how to answer a question. See Appendix D for detailed response frequencies for all survey questions.

Campus administrators generally were positive with respect to support from the ACE core team; most respondents ( $88 \%$ ) indicated that support from the ACE core team was excellent or very good. When asked which of the three ACE core focus areas (i.e., school culture, balanced literacy, effective data analysis and PLC) needed more development at campuses, administrators were most likely to indicate balanced literacy (47\%). Few administrators (9\%) felt that none of the core areas needed enhancement. In open-ended responses, campus administrators considered execution of the core factors at the top of both their most important successes and challenges. When asked to list what they considered to be the greatest successes this school year, administrators most frequently mentioned factors related to campus culture (54\%), data analysis (49\%), and balanced literacy (17\%). When asked to list the greatest challenges they faced, administrators were most likely to mention factors related to balanced literacy (39\%), campus culture (37\%), and data analysis (10\%). When asked to select the most important potential change that could improve future success for ACE teachers, administrators most frequently indicated improved behavioral management support ( $20 \%$ ) and more parent involvement ( $20 \%$ ). More planning time was the highest rated second most important potential change (20\%).

Parent and Community Partnerships. Sixty percent of administrators agreed that parents of students at their campuses were engaged with their children's progress, despite the fact that 76 percent indicated that more opportunities for parent engagement were offered on their campuses in 2017-18 than
at non-ACE campuses. Principals mentioned several efforts to encourage parent involvement that were implemented on their campuses, as shown in Figure 2.

## Figure 2. 2017-18 Summary of ACE Parent Engagement Activities

- Parent University (parents work toward GED)
- Tea/coffee/muffins/doughnuts with Teachers/Principals
- Academic nights (mathematics, literacy, etc.)
- Home visits and meetings in community venues
- Provision of parent transportation to meetings at campuses
- College nights
- Festivals/carnivals
- Career days
- Parent/child dances
- Regular student performances
- Principal meetings
- Grade-level meetings
- Community town hall meetings
- Parent-teacher organizations
- STAAR information assemblies

Campus leadership also encouraged partnerships with community organizations. These entities provided a wide variety of provisions and support to campuses. Figure 3 shows a summary of the types of organizations that partnered with ACE campuses and examples of the provisions and support provided by the organizations in 2017-18.

Figure 3. 2017-18 Summary of ACE Community Partnerships

Types of Organizations:

- Churches and religious organizations
- Businesses, credit unions, and law firms
- Local colleges and universities
- Libraries
- Police departments
- Large and small non-profit organizations
- Individuals

Types of Provisions/Support:

- Donations (e.g., money, clothing/uniforms, academic resources)
- Volunteer support (e.g., tutoring, mentoring, book buddies)
- Teacher appreciation incentives and events
- Facilities (e.g., instructional gardens, space for dances)
- Student events (e.g., carnivals, bullying/character lessons)
- Student recognition
- Community liaison

Program future. When asked what tools, services, or resources they would like to be more readily available in the future, campus administrators most frequently desired more training and networking opportunities ( $17 \%$ ). In addition, most campus administrators agreed they would be extremely or very likely to recommend that a colleague accept a principal or assistant principal position (92\%) or a teaching position (100\%) at an ACE campus.

## Teachers

Detailed teacher survey responses are provided in Appendix E. Highlights are included in this section for brevity. ${ }^{7}$

Response rates and participant characteristics. Overall, of the 457 teachers who received survey invitations, 317 (69\%) at least partially completed the survey. ${ }^{8}$ As shown in Table 4, campus response rates ranged from 46 percent (Dade) to 82 percent (Ray, Rusk). Ray teachers comprised the lowest percentage of total respondents (4\%), and Rusk teachers were most strongly represented (12\%). The rate of teacher respondents from each grade level ranged from six percent (prekindergarten) to 13 percent (grades two and three). Mathematics and reading/language arts teachers were most strongly represented ( $21 \%$ each). In the previous year, 45 percent of teacher respondents taught at their current or another ACE campus, and 85 percent taught at a campus in the Dallas ISD. Although a small proportion of respondents were first-year teachers (5\%), over half of respondents reported 10 or more years of teaching experience.

| 崖 | Total Sent | Completed ${ }^{\text {a }}$ Survey |  | Total Responses |
| :---: | :---: | :---: | :---: | :---: |
|  | N | n | \% | \% |
| Blanton | 38 | 30 | 78.9 | 9.5 |
| U. Lee | 39 | 30 | 76.9 | 9.5 |
| Mills | 23 | 16 | 69.6 | 5.0 |
| Pease | 27 | 21 | 77.8 | 6.6 |
| Dade | 63 | 29 | 46.0 | 9.1 |
| Edison | 33 | 21 | 63.6 | 6.6 |
| Zumwalt | 27 | 15 | 55.6 | 4.7 |
| ACE 1.0 | 250 | 162 | 64.8 | *51.1 |
| Carr | 36 | 26 | 72.2 | 8.2 |
| Ervin | 39 | 31 | 79.5 | 9.8 |
| Hernandez | 23 | 16 | 69.6 | 5.0 |
| Ray | 17 | 14 | 82.4 | 4.4 |
| Titche | 47 | 31 | 66.0 | 9.8 |
| Rusk | 45 | 37 | 82.2 | 11.7 |
| ACE 2.0 | 207 | 155 | 74.9 | 48.9 |
| Total | 457 | 317 | 69.4 | *100.0 |

Note: ${ }^{\text {an }}$ Includes respondents who at least partially completed the survey. *Total of campus-level results does not sum to overall percent because of rounding.

Successes and Challenges. As shown in Figure 4, over half of teacher respondents who had enough information to provide ratings felt that each of the five key factors were implemented very or extremely effectively on their campuses, and they most highly rated the effectiveness of instructional rigor (74\%), data analysis and PLC (72\%), and balanced literacy (71\%).

[^3]Figure 4: 2017-18 ACE Teacher Survey, Implementation Effectiveness

## How effectively were the following factors implemented at your ACE campus this year?

Source: 2017-18 ACE Teacher Survey.
Note: Percentages do not include respondents who indicated that a question was not applicable or that they did not know or were not sure how to answer a question. See Appendix E for detailed response frequencies for all survey questions.

When asked which of the three ACE core focus areas (i.e., school culture, balanced literacy, effective data analysis and PLC) needed more development at campuses, teachers were most likely to indicate school culture ( $44 \%$ ), while almost a quarter of teachers ( $24 \%$ ) felt that none of the core areas needed enhancement. Additionally, in open-ended responses, teachers most frequently mentioned factors related to data analysis as their greatest accomplishments (15\%), and factors related to school culture among their greatest challenges (12\%). Supporting these results, when asked to select the most important potential change that could improve future success for ACE teachers, teachers most frequently indicated improved behavioral management support as both their first ( $32 \%$ ) and second ( $20 \%$ ) most important potential change. More planning time was the second most highly rated first (14\%) and second (17\%) choice as an important change to the program that would enhance future teacher success.

Parent and Community Partnerships. Teachers were divided on the issue of parent engagement. Almost half (48\%) of teacher respondents agreed or strongly agreed that parents of their students were engaged with the progress of their children in 2017-18. This finding was despite the majority of teachers (67\%) agreeing that campus leadership offered additional opportunities for parent engagement on ACE campuses than would be typically available at non-ACE campuses.

Compensation and Future. ACE teachers generally were satisfied with their compensation. Over half of teachers (67\%) strongly agreed or agreed that the stipend they received for serving as an ACE teacher was fair considering the extra effort required. To quantify the extent of the additional workload, the highest percentage of ACE teachers who had worked at non-ACE campuses in the past (48\%) indicated that they worked about 11 to 20 extra hours per week than they had typically worked in the past at non-ACE campuses.

When asked what tools, services, or resources they would like to be more readily available in the future, teachers most frequently desired more professional development ( $11 \%$ ) and more available general resources ( $10 \%$ ). Forty percent of teacher respondents were extremely or very likely to recommend that a colleague teach at an ACE campus.

## What were the outcomes related to the people component of ACE?

Program leadership designated four outcome objectives for evaluation of the people component of ACE, including 1) annual retention rates, 2) rates of teachers with at least a Proficient I TEI effectiveness level, 3) fall and spring percentages of proficient teachers as measured by average TEI spot observation scores on standard 2.3 (clear instruction) and 2.4 (instructional rigor), and 4) positive quintile ${ }^{9}$ scores on the Culture of Feedback and Support section of the semi-annual district Climate Survey.

## Methodology

## Teacher Retention

The ACE objective was to attain campus teacher retention rates at or above district rates. Because 2017-18 was the first year after reconstitution for ACE 2.0 campuses, resulting in almost complete teacher turnover, this objective was evaluated only for ACE 1.0 campuses. The Dallas ISD Data Analytics and Control department ${ }^{10}$ provided data indicating the number of teachers on ACE campuses on October 28, 2016 who remained on that campus (stayers), moved to another ACE or non-ACE campus in the district (movers), or resigned from a teaching role in the district (leavers) ${ }^{11}$ by one year later on October 27, 2017. The evaluator used frequency analyses to calculate rates for each of these scenarios by ACE campus and overall for ACE 1.0 campuses, ACE 2.0 campuses, all ACE campuses, Intensive Support Network (ISN; see Appendix A) campuses, and the district.

## Proficient or Higher TEI Effectiveness Levels

The ACE objective was to attain a minimum of 60 percent of teachers at campuses with at least a Proficient I TEI effectiveness level. The Dallas ISD Data Analytics and Control department provided campus-level data indicating the rates of teachers by campus at each TEI effectiveness level in 2017-18. ${ }^{12}$ The evaluator grouped ratings into three categories: 1) Exemplary I and II; 2) Proficient I, II, or III; and 3) Below Proficient, No Level, or not applicable (N/A) and used frequency analyses to calculate the rates of teachers in each group by ACE campus, ACE 1.0/ACE 2.0 overall, ACE overall, ISN campuses overall, and the district.

[^4]
## Spot Observations

The ACE objective was to attain high percentages (fall: 60\%; spring: 75\%) of proficient teachers as measured by average TEI spot observation scores on standard 2.3 (clear instruction) and 2.4 (instructional rigor). The Dallas ISD Data Analytics and Control department provided 2017-18 spot observation scores by teacher for TEI sections 2.3 (Are all students able to understand the content in a clear and cohesive manner?; clear instruction) and 2.4 (Are all students engaged in appropriately challenging/demanding content?; instructional rigor). Average spot observation scores were aggregated by teacher, ${ }^{13}$ and further aggregated by campus and for the ACE program overall to obtain the mean number of spot observations, and mean, minimum, maximum, and median spot observation scores. From these analyses, the evaluator used frequency analyses to determine the number and percentage of teachers with average spot observation scores at or above the proficient threshold score of 2.0.

## Climate Survey

The ACE objective was to attain fourth or fifth quintile scores on the Culture of Feedback and Support section on the semi-annual district Climate Survey. The evaluator obtained Climate Survey ${ }^{14}$ data for each campus from district files dated January 22, 2018 (fall 2017) and June 4, 2018 (spring 2018) and extracted the district quintile scores on the Culture of Feedback and Support section for each ACE campus. For comparison purposes, the evaluator extracted the quintiles reported for the fall and spring semesters of 2014-15, 2015-16, and 2016-17 from Climate Survey reports from previous years.

## Results

## Teacher Retention

As shown in the "stayers" column of Table 5, ACE 1.0 campus teacher retention rates ranged from 44 percent (Pease) to 83 percent (Blanton, Zumwalt), with an overall ACE 1.0 teacher retention rate of 70 percent. Although overall the ACE 1.0 campuses did not meet or exceed the district teacher retention rate of 73 percent, three campuses (Blanton, U. Lee, Zumwalt) retained teachers at a rate exceeding the district, and an additional two campuses (Mills, Dade) attained over 70 percent teacher retention rates. The 12 percent ( $n=32$ ) of ACE 1.0 teachers who moved to another campus between fall 2016 and fall 2017 included three percent $(n=8)$ who moved to campuses within the ACE program $[1 \%(n=3)$ to ACE 1.0 and $2 \%(n=5)$ to ACE 2.0] and nine percent $(n=24)$ who transferred to other campuses that were not part of the ACE program.

| ACE 1.0 | 271 | 18.1 | 11.8 | 70.1 |
| ACE 2.0 | 231 | 32.5 | 60.6 | 6.9 |
| ACE | 502 | 24.7 | 34.3 | 41.0 |
| ISN | 677 | 22.7 | 9.5 | 67.8 |
| District | 10,529 | 18.5 | 8.8 | 72.7 |
| Source: Dallas ISD Data Analytics and Control dated February 2, 2018. <br> Note: Status in the last week of October, 2017 was determined for teachers on campus as of the last week of October, 2016. Leavers $=$ teachers no longer holding an instructional role in the district. Movers = teachers moved to another campus within Dallas ISD. Stayers $=$ teachers retained on same campus. 2017-18 was the first year for the second ACE cohort (ACE 2.0); retention rates for ACE 2.0 campuses expectedly will be lower than for the original (ACE 1.0) cohort campuses. Percentages may not sum to 100 percent because of rounding. |  |  |  |  |

## Proficient or Higher TEI Effectiveness Levels

As illustrated in Figure 5, four of the seven ACE 1.0 campuses (Blanton, U. Lee, Mills, Zumwalt), five of the six ACE 2.0 campuses (Carr, Ervin, Hernandez, Ray, Titche), and ACE 1.0, ACE 2.0, and ACE overall attained this objective. This objective appeared to be more difficult to obtain at the middle school level, with one of the four ACE middle schools (Zumwalt) attaining this objective. Percentages of teachers with each TEI effectiveness level by campus for 2017-18 are provided in Appendix F.

## Spot Observations

Detailed metrics for 2017-18 spot observation scores for sections 2.3 (clear instruction) and 2.4 (instructional rigor) for all ACE campuses and for ACE overall are included in Appendix G. Figure 6 shows rates of proficient average spot observation scores by campus.

In general, ACE teachers earned higher ratings for clear instruction than for instructional rigor both in the fall and in the spring. In fall 2017, four elementary school campuses (Blanton, U. Lee, Ervin, Titche) and one middle school campus (Zumwalt) met or exceeded the 60 percent fall threshold for clear instruction, and two elementary school campuses (U. Lee, Ervin) and one middle school campus (Zumwalt) met or exceeded this threshold for instructional rigor. ACE 1.0, ACE 2.0, and ACE overall did not meet the fall 2017 objective for proficient spot observations for clear instruction or instructional rigor.

In spring 2018, eight ACE elementary school campuses (Blanton, U. Lee, Mills, Carr, Ervin, Hernandez, Ray, Titche) and three ACE middle school campuses (Dade, Edison, Zumwalt) met or exceeded the 75 percent spring threshold for clear instruction. Five elementary school campuses (U. Lee, Carr, Ervin, Ray, Titche) and two middle school campuses (Dade, Zumwalt) met or exceeded this threshold for instructional rigor. ACE 1.0, ACE 2.0, and ACE overall met the spring 2018 objective for clear instruction, but the ACE 1.0, ACE 2.0, and ACE campuses overall slightly missed the 75 percent objective for instructional rigor.

Note: Average spot observation scores of 2.0 or higher were considered "proficient." Spot observations with a "complete" status were included in calculations.

## Climate Survey

Table 6 shows the quintile score for each ACE campus on the Culture of Feedback and Support section of the 2017-18 fall and spring Climate Surveys, as well as quintile scores for the fall and spring semesters of the previous three academic years, as appropriate. In fall 2017, one ACE 1.0 campus (U. Lee) and four ACE 2.0 campuses (Carr, Hernandez, Ray, Titche) achieved scores in the fourth or fifth quintiles (most positive) on this section of the climate survey. Except for Hernandez, these same campuses also achieved the fourth or fifth quintile in spring 2018.

Table 6: 2014-15 to 2017-18 ACE Campus Climate Survey Quintile Scores (Culture of Feedback and Support)

| Campus | 2014-15 |  | 2015-16 |  | 2016-17 |  | 2017-18 |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| Ervin |  |  |  |  | 1 | 2 | 1 | 2 |
| Hernandez |  |  |  |  | 2 | 3 | 4 | 3 |
| Ray |  |  |  |  | 3 | 1 | 4 | 5 |
| Titche |  |  |  |  | 1 | 1 | 4 | 5 |
| Rusk |  |  |  |  | 1 | 3 | 1 | 1 |

Source: District Climate Survey files dated January 7, 2016 (fall 2015), June 2, 2016 (spring 2016), January 6, 2017 (fall 2016), June 5, 2017 (spring 2017), January 22, 2018 (fall 2017), and June 4, 2018 (spring 2018).
Note: aBecause Carr and Carver merged in 2017-18, 2016-17 scores for Carr include both Carr and Carver; 2017-18 scores are for Carr only. Scores in the fourth or fifth quintile are highlighted in blue bold.

## What were the outcomes related to the learning component of ACE?

ACE program leadership designated Istation Indicators of Progress (ISIP) Tier 1 rates (each six-week period and end of year), Assessment of Course Performance (ACP) passing rates (fall and spring), and State of Texas Assessments of Academic Readiness (STAAR) performance standard attainment rates (spring) as metrics to evaluate the 2017-18 learning component of ACE.

## Methodology

## Istation Indicators of Progress (ISIP)

The first outcome used to evaluate the learning component of ACE was rates of Tier 1 attainment on ISIP. The ACE objective was to attain rates of students reading at Tier 1 at or above district rates. The evaluator and program leadership planned further longitudinal comparisons to provide additional insight into ACE ISIP achievement. ISIP is a computer-adaptive assessment that provides continual monitoring of progress in reading skills. ISIP scores are assigned to tiers based on student score percentiles. An assignment of Tier 1 indicates the student score fell into the $40^{\text {th }}$ percentile or above and is considered at or above grade level.

District ISIP data files for 2016-17 and 2017-18 were pulled at the end of each six-week period. Files for 2014-15, 2015-16, 2016-17, and 2017-18 also were pulled for assessment windows at the beginning, middle, and end of each academic year. ${ }^{15}$ English and Spanish administrations were pulled separately, and also were combined into one file to allow for examination of overall student performance. ${ }^{16}$ If a student completed an assessment in both languages, departmental guidelines were used to determine which assessment to include in the combined dataset. ${ }^{17}$ If a student took the test more than once in a period, the latest score was used. The evaluator merged these district files ${ }^{18}$ with the PEIMS demographic files for each respective year. ${ }^{19}$

The evaluator used frequency and crosstab analyses to determine the percentage of kindergarten to grade two students performing at Tier 1 (grade level) by ACE campus and overall for ACE 1.0/2.0 campuses, ACE overall, ISN campuses, and the district. These analyses were conducted for 1) each six-week period in 2016-17 and 2017-18 and 2) for the beginning of the year (BOY), middle of the year (MOY) and end of the year (EOY) for 2014-15, 2015-16, 2016-17, and 2017-18. The evaluator then calculated one-, two-, and three-year (BOY, MOY, EOY) differences in rates of students reading on grade level.

## Assessment of Course Performance (ACP)

The second outcome used to evaluate the learning component of ACE was ACP scores. The ACE objective was to achieve $A C P$ passing rates for each exam within 10 percentage points or exceeding district rates for fall 2017 and spring 2018. The evaluator and program leadership planned additional comparisons to provide deeper insight into ACE ACP achievement. $A C P$ exams are standardized final semester exams developed by the Local Assessment Department in conjunction with the Department of Teaching and Learning; they are aligned with Texas Essential Knowledge and Skills. ${ }^{20,21}$ Scores for ACP tests administered on ACE campuses were obtained from district files dated February 2, 2017 (fall 2016), June 27, 2017 (spring 2017), February 9, 2018/February 23, 2018/March 6, 2018 (fall 2017), and June 20, 2018 (spring 2018) and merged with PEIMS demographic data for the associated academic year. Scores of 70

[^6]or higher were considered passing, and the percentages of students passing were aggregated for fall and spring of each year by test, test language, campus, grade level (elementary, middle), ACE 1.0, ACE 2.0, ACE overall, ISN overall, and for the district. For comparison purposes, ${ }^{22}$ the evaluator calculated percentage point differences in passing rates from the previous year and from district passing rates.

The evaluator further examined ACE ACP achievement for fall 2017 and spring 2018 by summarizing the number and percentage of exams with overall passing rates exceeding the previous year and within 10 percentage points or exceeding the district. These results were calculated by subject area, by grade level (elementary or middle), and for ACE 1.0, ACE 2.0, and for ACE overall.

## State of Texas Assessments of Academic Readiness (STAAR)

The third outcome used to evaluate the learning component of ACE was attainment of performance standards on spring 2018 STAAR subtests. The ACE objective was to achieve STAAR performance standard attainment rates within ten percentage points or exceeding the district. The evaluator and program leadership planned additional comparisons to provide deeper insight into ACE STAAR achievement.

STAAR exams are state-mandated standardized tests that assess student knowledge by subject and grade level in the primary and secondary grades. ACE students were tested in grades three to eight in mathematics and reading. Students also were tested in writing in grades four and seven, science in grades five and eight, and social studies in grade eight. Students at the high school level took STAAR End-of-Course (EOC) assessments in various subjects. Because the highest grade in which ACE students were enrolled was grade eight, only the outcomes for grade eight students taking the Algebra I EOC were included in this evaluation.

Academic performance standards represent the degree to which students have mastered required content as measured by test scores. ${ }^{23}$ STAAR assessment scores are categorized into four levels to describe student performance: 1) Does Not Meet Grade Level (Does Not Meet), 2) Approaches Grade Level or Above (Approaches+), 3) Meets Grade Level or Above (Meets+), and 4) Masters Grade Level (Masters). ${ }^{24}$ Cut scores divide student scores into these four categories.

Changes in STAAR standards for $2016^{25}$ had several consequences for interpreting changes in STAAR results from year to year. Because 2016 was the first year since STAAR inception that the state

[^7]raised the passing standards on the STAAR, students generally were required to correctly answer a few more questions in 2016 than they were in 2015 to reach STAAR performance standards for the same subject. Further complicating the matter, several exam structure and format changes were implemented in 2017. ${ }^{26}$ Therefore, comparing 2015 performance standard attainment rates to those for future years is not straightforward. In essence, the higher standard starting in 2016 means that one-, two-, and three-year STAAR performance standard attainment rate improvements from 2015 may appear smaller than they would have been if calculating current rates using the 2015 standard cutoffs. However, using the standard cutoffs specific to each year is closest to reality because current year standards were used for annual accountability ratings, regardless of the outlined changes. In addition, because 2014-15 was the year before inception of the ACE 1.0 program, and therefore serves as a baseline year, comparing current performance standard attainment rates to 2014-15 rates was the best way to measure STAAR progress attributed to the ACE program for the ACE 1.0 campuses. In sum, STAAR comparisons to 2015 performance standard attainment provided in this report should be interpreted with caution because they were based on data from differing annual circumstances.

The evaluator merged first and second administration district STAAR data files for 2015, 2016, 2017, and $2018{ }^{27}$ with the PEIMS demographic files for each respective year. ${ }^{28}$ The evaluator then ran crosstab and frequency analyses to calculate performance standard attainment rates on all versions of STAAR and the Algebra I EOC. The evaluator analyzed STAAR data in several ways for this evaluation. First, the evaluator calculated rates of students at the Approaches+, Meets+ and Masters performance standards for 2018 and for the previous one (ACE 1.0/2.0, ISN, district), two (ACE 1.0, district), and three (ACE 1.0, district) years. Rates of students attaining each of the performance standards were calculated for the current and previous years by ACE campus, and for ACE 1.0, ACE 2.0, ACE overall, ISN, and the district overall. One-, two- and three-year trends in performance standard attainment rates were calculated, as appropriate.

Rates of students attaining the Approaches+ STAAR performance standard also were summarized for 2015, 2016, 2017, and 2018 by student groups including sex, ethnicity, English language learner (ELL) status, economically disadvantaged status (EcoDis), and special education status (SPED) for ACE 1.0, ACE 2.0, ACE overall, ISN, and for the district. The evaluator then calculated one-, two- and three-year trends in Approaches+ attainment for ACE 1.0 and for the district. The evaluator also calculated one-year trends for ACE 2.0, and ISN.

The evaluator further examined ACE STAAR achievement for 2018 by summarizing the number and percentage of exams with overall Approaches+ and Meets+ attainment rates exceeding the previous

[^8]year and within 10 percentage points or exceeding the district. These results were calculated by subject area, by grade level (elementary or middle), and for ACE 1.0, ACE 2.0, and ACE overall.

## Results

## Istation Indicators of Progress (ISIP)

Generally, overall rates of ACE students reading on grade level trended upward most six-week periods from the start to the end of the year for all grade levels. Figures 7 to 9 (ACE 1.0) and 10 to 12 (ACE 2.0) illustrate trends in the percentage of Tier 1 ISIP scores for each six-week period by campus and overall for ACE and the district. Six-week Tier 1 details for 2017-18 are provided in Appendix I. In most cases, ACE 1.0 campuses increased the extent to which rates of students reading on grade level exceeded the district. ACE 2.0 rates of Tier 1 students did not consistently exceed the district, especially in English, but when they fell short of district rates they clearly narrowed shortfalls by the end of the year.

Figure 7: 2017-18 ACE 1.0 Six-Week Tier 1 Percentages on ISIP (Combined English and Spanish)

Source: District ISIP files dated June 20, 2016 (2015-16), October 5, 2016 (2016-17, SW1), November 8, 2016 (2016-17, SW2), January 10, 2017 (2016-17, SW3), February 28, 2017 (2016-17, SW4), April 17, 2017 (2016-17, SW5), May 30, 2017 (2016-17, SW6), October 10, 2017 (2017-18, SW1), November 8, 2017 (2017-18, SW2), January 9, 2018 (2017-18, SW3), March 1, 2018 (2017-18, SW4), April 19, 2018 (2017-18, SW5), and June 3, 2018 (2017-18, SW6) for students enrolled on the PEIMS snapshot dates of October 28, 2016 (2016-17) and October 27, 2017 (2017-18).
Note: SW\# = six-week period \#. ISN = Intensive Support Network campuses (see Appendix A). LY = Last year. Latest score was used if assessment taken more than one time in assessment period. Sample sizes for each data point are provided in Appendix I.

Note: SW\# = six-week period \#. ISN = Intensive Support Network campuses (see Appendix A). LY = Last year. Latest score was used if assessment taken more than one time in assessment period. Sample sizes for each data point are provided in Appendix I.

ISIP Tier 1 rates for the current year and previous three years are provided in Appendix J. At EOY, ACE campuses overall met the objective of meeting or exceeding district rates of students reading at grade level (Tier 1) for kindergarten to grade two in Spanish and in combined English and Spanish. For English alone, ACE campuses overall met this criteria in kindergarten, but not for grade one or grade two. ACE 1.0 campuses met or exceeded the district in all versions in all grades, but ACE 2.0 campuses fell short of this goal for grade one and grade two, primarily because of performance on the English version of the assessment.

Figure 13 shows one-year trends in Tier 1 attainment for ACE 1.0, ACE 2.0, ACE overall, ISN, and the district. Figures 14 and 15 show two- and three-year trends in Tier 1 attainment for ACE 1.0 and the district. Appendix J also includes one-, two-, and three-year changes in Tier 1 attainment rates for ACE campuses, ACE 1.0, ACE 2.0, ACE overall, ISN, and the district, as applicable.

For 2017-18, one-year changes in overall ACE Tier 1 attainment rates on all versions of ISIP were stronger than for the district. As expected, this pattern was particularly true for ACE 2.0 campuses in their first year of ACE implementation.

For the ACE 1.0 cohort, longitudinal results reflect sustained accelerated achievement in reading on grade level for kindergarten to grade two overall, despite smaller year-over-year gains in years two and three of the ACE program. The ACE 1.0 growth in 2017-18 adds to the extensive growth in Tier 1 attainment over the previous two years of the program. As shown in Figure 14, ACE 1.0 two-year trends also exceeded district growth across the board. The strongest evidence of literacy growth for ACE students is illustrated in Figure 15. Not only did the three-year growth in Tier 1 attainment for ACE 1.0 students in all grades far exceed the district in English, Spanish, and combined English and Spanish, but this three-year growth ranged from +32.0 percentage points (kindergarten Spanish) to +45.1 percentage points (grade two English).

Note: Change expressed in percentage points. Sample sizes and Tier 1 rates by category/year are provided in Appendix J; ISN = Intensive Support Network campuses (see Appendix A).

## Assessment of Course Performance (ACP)

ACP fall and spring exam passing rates by campus, ACE 1.0/2.0, ACE overall, ISN, and district are provided in Appendix K. In summary, as shown in Table 7, 2018 ACP passing rates for ACE overall exceeded the previous year on $39(80 \%)$ of the 49 exams administered on the campuses in the fall, and on six $(75 \%)$ of the eight exams administered in the spring. As expected, these rates were particularly strong for ACE 2.0 campuses after their first year in the program.

In addition, ACE students overall met the objective of passing rates within 10 percentage points or exceeding district rates on 38 ( $78 \%$ ) of 49 ACPs in the fall and on three ( $38 \%$ ) of the eight spring ACPs. This success rate was virtually the same for ACE 1.0 and ACE 2.0 in the fall, but was particularly strong for ACE 2.0 campuses compared to ACE 1.0 campuses in the spring.

Table 7: 2018 ACE ACP Exam Passing Rate Comparisons to Previous Year and District by Subject

|  | Tests | Fall 2017 |  |  |  | Spring 2018 |  |  |  |  |

| All Middle Tests | 24 | 19 | 79.2 | 15 | 62.5 | 8 | 6 | 75.0 | 3 | 37.5 |

Source: District ACP files dated February 2, 2016 (fall 2016), June 27, 2017 (spring 2017), January 31, 2017 (fall 2017), and June 20, 2018 (spring 2018) for students enrolled on the PEIMS snapshot date for the given year.
Note: Exam passing rates are shown in Appendix K. Exams are included in the total count if five or more students were assessed. If tests were not taken in the previous year, they were included in the total test count but not in the total of exams that exceeded last year, allowing for 2017-18 passing rate comparisons to district rates, regardless of whether the tests were administered last year. N/A = not applicable. $\mathrm{LA}=$ language arts.

## State of Texas Assessments of Academic Readiness (STAAR)

The 2017-18 ACE objective for STAAR was to achieve passing rates at least within 10 percentage points of district rates. Detailed STAAR 2015 to 2018 passing rates at all performance standards by campus and for ACE 1.0/2.0, ACE overall, ISN, and the district are provided in Appendix L. One-, two-, and threeyear changes in STAAR Approaches+ attainment for student groups by campus and for ACE 1.0/20, ACE overall, ISN, and the district, as appropriate, are provided in Appendix M, Appendix N, and Appendix O, respectively.

As illustrated in Figures 16 and 17, ACE students overall achieved passing rates at least within 10 percentage points of the district for all subjects at the Approaches+, Meets+, and Masters performance standards. This finding was true for ACE 1.0 and 2.0, except for ACE 1.0 reading, which came a few points short of meeting this objective. Notably, ACE 2.0 social studies slightly exceeded district passing rates for social studies at all three performance standards.

Figure 16: 2018 Percentage of Students Attaining STAAR Approaches+ or Meets+ Performance Standards by Subject for ACE, ISN, and District Overall

## Approaches+

Reading

Writing

Science

Social Studies

Source: District STAAR files dated June 20, 2018 (grades three to eight), and June 20, 2018 (Algebra I EOC) for students enrolled on the PEIMS snapshot date of October 27, 2017.
Note: Approaches $+=$ achieved the Approaches Grade Level or Above performance standard. Meets $+=$ achieved the Meets Grade Level or Above performance standard. Rates reflect the first and second administrations of all versions of STAAR and grade eight Algebra I EOC. Scores from STAAR Alternate-2 were not evaluated against the Meets+ performance standard for any exam; these students were excluded when calculating Meets+ rates. Although all scores are included, some test scores may have been adversely affected by online testing issues. ISN = Intensive Support Network campuses (see Appendix A). Sample sizes are provided in Appendix L.

Figure 17: 2018 Percentage of Students Attaining STAAR Masters Performance Standard by Subject for ACE, ISN, and District Overall

# Masters 

Source: District STAAR files dated June 20, 2018 (grades three to eight), and June 20, 2018 (Algebra I EOC) for students enrolled on the PEIMS snapshot date of October 27, 2017.
Note: Masters = achieved the Masters Grade Level or Above performance standard. Rates reflect the first and second administrations of all versions of STAAR and grade eight Algebra I EOC. Although all scores are included, some test scores may have been adversely affected by online testing issues. ISN = Intensive Support Network campuses (see Appendix A). Sample sizes are provided in Appendix L

With few exceptions, ACE STAAR passing rates increased over time across the board in all subjects for all performance standards. As shown in Figure 18, generally, this one-year growth was strongest for mathematics and social studies, especially for ACE 2.0, an expected outcome in the first year of the program for these campuses. Two- and three-year changes in STAAR passing rates for ACE 1.0 campuses also were mostly positive (see Figure 19). The strongest overall three-year percentage point gains for ACE 1.0 campuses emerged in mathematics (+34) and social studies (+28) at the Approaches+ level, in mathematics (+30), writing (+19), and science (+19) at the Meets+ level, and mathematics (+15) at the Masters level. These three-year results are a testament to the ongoing impact of ACE implementation on these campuses.

Figure 18: 2017 to 2018 One-Year ACE STAAR Trends by Subject
ACE 1.0
ACE 2.0

- 2017 - 2018

Source: District STAAR files dated June 20, 2018 (grades three to eight), and June 20, 2018 (Algebra I EOC) for students enrolled on the PEIMS snapshot date of October 27, 2017.
Note: Approaches $+=$ achieved the Approaches Grade Level or Above performance standard. Meets $+=$ achieved the Meets Grade Level or Above performance standard. Masters = achieved the Masters Grade Level performance standard. Rates reflect the first and second administrations of all versions of STAAR and grade eight Algebra I EOC. Scores from STAAR Alternate-2 were not evaluated against the Meets+ performance standard for any exam; these students were excluded when calculating Meets+ rates. Although all scores are included, some test scores may have been adversely affected by online testing issues. Sample sizes are provided in Appendix L.

Figure 19: 2016 to 2018 Two-Year and 2015 to 2018 Three-Year ACE 1.0 STAAR Trends by Subject
Two-Year ACE 1.0*
Three-Year ACE 1.0**

Source: District STAAR files dated June 20, 2018 (grades three to eight), and June 20, 2018 (Algebra I EOC) for students enrolled on the PEIMS snapshot date of October 27, 2017.
Note: Approaches $+=$ achieved the Approaches Grade Level or Above performance standard. Meets $+=$ achieved the Meets Grade Level or Above performance standard. Masters = achieved the Masters Grade Level performance standard. Rates reflect the first and second administrations of all versions of STAAR and grade eight Algebra I EOC. Scores from STAAR Alternate-2 were not evaluated against the Meets+ performance standard for any exam; these students were excluded when calculating Meets+ rates. Although all scores are included, some test scores may have been adversely affected by online testing issues. ${ }^{*}=$ Prior to 2017, Approaches+ was called Level II: Satisfactory Academic Performance, Meets+ was called Final Level II, and Masters was called Level III: Advanced Academic Performance. ${ }^{* *}=$ Cut scores increased slightly in 2016; therefore, comparisons to 2015 STAAR results should be reviewed with caution. Sample sizes are provided in Appendix L.

In sum, as shown in Table 8, in 2017-18 STAAR passing rates exceeded 2016-17 on all STAAR subjects administered on ACE campuses at both the Approaches+ and Meets+ performance standards. Considered separately, both ACE cohorts performed exceptionally well with ACE 1.0 campuses exceeding
last year on 83 percent of exams at the Approaches+ standard and 78 percent of exams at the Meets+ level, and ACE 2.0 campuses exceeding last year on 94 percent of exams at the Approaches+ level and 100 percent of exams at the Meets+ level.

As shown in Table 8, ACE students overall met the 2017-18 objective of STAAR performance standard attainment rates within at least 10 percentage points of or exceeding district rates on 15 (83\%) of 18 STAAR at the Approaches+ performance standard and on $12(67 \%)$ of the 18 STAAR subtests at the Meets+ level. This success rate was slightly higher for ACE 2.0 ( $83 \%$ ) than for ACE 1.0 ( $61 \%$ ), as expected, but both cohorts achieved the STAAR objective for 2017-18 on a majority of the tests administered.

Source: District STAAR files dated June 15, 2017 (2017 grades three to eight), and June 22, 2017 (2017 Algebra I EOC), June 20, 2018 (STAAR and Algebra I EOC).
Note: Approaches+ = Approaches Grade Level or Above. Meets $+=$ Meets Grade Level or Above. All rates include scores for first and second administrations of all versions of STAAR and grade eight Algebra I EOC, as applicable. Scores from STAAR Alternate-2 were not evaluated against the Meets+ performance standard for any exam; these students were excluded when calculating Meets+ rates. Although all scores are included, some test scores may have been adversely affected by online testing issues. Scores included for students enrolled as of the PEIMS snapshot dates for each year. STAAR outcome details are provided in Appendix L.

## What were the outcomes related to the expectations component of ACE?

ACE program leadership designated disciplinary offenses, attendance rates, Student Experience Survey results, and Parent/Guardian survey results as metrics to evaluate the 2017-18 expectations component of ACE.

## Methodology

## Disciplinary Offenses

The first outcome used to evaluate the expectations component of ACE was disciplinary offenses. The ACE objective was to achieve 2017-18 disciplinary offense rates at or below the district average. The evaluator obtained disciplinary data from district data files dated July 19, 2018 and aggregated level I, II, and III disciplinary offenses by campus, by ACE overall, and for the district elementary and middle schools. The evaluator pulled ACE 1.0 numbers from the 2015-16 and 2016-17 evaluations (Palladino, 2016; 2017) for 2014-15 and 2015-16 to calculate one-, two-, and three-year changes in total referrals. To calculate the number of referrals at ACE 2.0 campuses in 2016-17 (pre-ACE), the evaluator used district discipline files dated July 10, 2017 and aggregated total disciplinary offenses by campus and for ACE 2.0 overall.

## Attendance Rates

The second outcome used to evaluate the expectations component of ACE was attendance rates. The ACE objective was to achieve 2017-18 attendance rates at or above 96 percent. The evaluator joined district attendance files for 2017-18 dated June 11, 2018 with demographic files from October 27, 2017 (PEIMS snapshot date). Attendance rates were calculated by aggregating days in attendance and days enrolled for each group (campus, ACE 1.0, ACE 2.0, ACE overall, ISN, districtwide) and then dividing aggregated days in attendance by aggregated days enrolled.

## Student Experience Survey

The third outcome used to evaluate the expectations component of ACE was results of the district Student Experience Survey. ${ }^{29}$ The ACE objective was to achieve 2017-18 positive response rates at or above the district average. Student perceptions also were reviewed by comparing ACE campus rates of overall favorable responses on the survey for the current year to favorable rates from the one (ACE 1.0 and ACE 2.0), two (ACE 1.0), and three (ACE 1.0) previous years and to 2017-18 district favorable rates. The Student Experience Survey was administered districtwide as a component of the TEI to 1) understand the needs and perceptions of students and 2) evaluate and improve teacher effectiveness. Rates of favorable responses from the Student Experience Survey for ACE campuses and the district were extracted from campus-level reports and data files dated June 5, 2018. ${ }^{30}$ The evaluator extracted ACE 1.0 favorable rates from the previous three years by campus, ACE overall, and the district overall from the 2016-17 ACE

[^9]evaluation report (Palladino, 2017). The evaluator extracted ACE 2.0 Student Experience Survey positive response rates for 2016-17 from district files dated May 24, 2017.

## Parent/Guardian Survey

The fourth outcome used to evaluate the expectations component of ACE was results of the Parent/Guardian survey. The ACE objective was to achieve 2017-18 positive response rates at or above the district average. Parent perceptions were evaluated by comparing rates of favorable responses to one (ACE 1.0 and ACE 2.0), two (ACE 1.0), and three (ACE 1.0) previous years on the annual districtwide Parent/Guardian Survey. The Parent/Guardian Survey, conducted as part of the Principal Excellence Initiative (PEI), ${ }^{31}$ was designed to measure parent and guardian engagement with and support for the direction of their children's campuses. Rates of favorable responses from the Parent/Guardian Survey were extracted from district data files dated July 18, 2018. Six of the 13 ACE campus sample sizes were below established requirements, and results for these campuses (Mills, Pease, Edison, Hernandez, Ray, Rusk) should be considered with caution and are provided for information only. To examine trends, the evaluator also extracted favorable rates by campus and for the district overall for 2014-15 and 2015-16 from the district data file dated June 4, 2016, and for 2016-17 from district data files dated June 6, 2017.

## Results

## Disciplinary Offenses

For the 2017-18 academic year, three ACE elementary schools (Blanton, Mills, Ray) and three middle schools (Dade, Zumwalt, Rusk) met the ACE objective of reporting level I, II, and III disciplinary referrals at a rate at or below district average rates (see Table 9). ACE 1.0 elementary school and middle school campuses overall and the ACE 2.0 middle school campus also met this objective.

Source: District student discipline files dated August 5, 2015 (2014-15), July 13, 2016 (2015-16), July 10, 2017 (2016-17), and July 19, 2018 (2017-18).
Note: ES = elementary school. MS = middle school. Avg = average. $\mathrm{Yr}=$ year. $\Delta=$ change. $^{\text {a }}=$ Because Carr and Carver merged in 2017-18, 2016-17 numbers for Carr include both Carr and Carver; 2017-18 numbers are for Carr only. $\mathrm{b}=2014-15$ and 2015-16 ACE totals, averages, and 2 - and 3 -year changes are shown for ACE 1.0 only. Averages shown are rounded to the nearest whole number. Referral rates at or below district average rates are in blue bold.

In addition, compared to 2016-17, eight elementary school campuses (Blanton, U. Lee, Mills, Pease, Carr, Ervin, Ray, Titche) and three middle school campuses (Dade, Zumwalt, Rusk) reported the same or reduced total disciplinary offenses in 2017-18 (see Table 9). Overall, ACE 1.0 campuses reduced total offenses by 89 (15\%) from 2016-17. As illustrated in Figure 20, 2017-18 referral reductions contributed to a successful 3,391 ( $87 \%$ ) reduction in ACE 1.0 disciplinary referrals over three years of program participation. As shown in Figure 21, ACE 2.0 campuses overall mirrored the overall success of the first ACE cohort by reducing total offenses by 1,218 (77\%) in the first year in the program.

## Attendance Rates

Table 10 shows 2016-17 and 2017-18 end-of-year attendance rates for ACE campuses, and for ACE 1.0, ACE 2.0, ACE overall, ISN, and the district. Four elementary schools (Blanton, U. Lee, Ervin, Titche) attained attendance rates of at least 96 percent for the 2017-18 academic year, thus meeting the ACE objective for attendance. One middle school campus (Rusk) met this ACE attendance objective. Overall, ACE attendance rates for the current year were slightly higher than for ISN campuses, and were comparable to district rates. On the cohort level, although ACE 1.0 overall attendance did not meet the 2017-18 objective, ACE 2.0 finished the year meeting the 96 percent attendance objective.

Table 10: 2016-17 and 2017-18 ACE Attendance Rates by Campus

| Campus | $\begin{gathered} \hline 2016-17 \\ \% \\ \hline \end{gathered}$ | $\begin{gathered} \hline 2017-18 \\ \% \\ \hline \end{gathered}$ | 1 Yr $\Delta$ \%pts |

| Titche | 95.7 | 96.3 | 0.6 |
| Rusk | 95.2 | 95.8 | 0.6 |
| ACE 2.0 | 95.4 | 95.6 | 0.2 |
| All ACE | 95.1 | 95.0 | -0.1 |
| ISN | 94.2 | 94.3 | 0.1 |
| District | 95.6 | 95.4 | -0.2 |

Source: District attendance files dated June 20, 2017 (2016-17) and June 11, 2018 (2017-18) for students enrolled on the PEIMS snapshot dates of October 28, 2016 (2016-17) and October 27, 2017 (2017-18).
Note: Attendance rates meeting or exceeding goal of 96 percent (rounded) are in blue bold. ISN = Intensive Support Network. * = Because Carr and Carver merged in 2017-18, 2016-17 scores for Carr include both Carr and Carver; 2017-18 scores are for Carr only. $\Delta=$ change. \%pts = percentage points.

## Student Experience Survey

ACE students generally responded favorably on the districtwide student survey. Overall percentages of favorable ratings for each section and overall on the 2017-18 Student Experience Survey are shown in Table 11. In 2017-18, five ACE elementary schools (Blanton: 95\%, U. Lee: 90\%, Carr: 85\%, Hernandez: $86 \%$; Titche: $91 \%$ ) and ACE elementary schools overall ( $87 \%$ ) exceeded the district favorable rate of 84 percent for elementary schools. Three ACE middle schools (Dade: 74\%; Zumwalt, 81\%; Rusk: $75 \%$ ) and ACE middle schools overall (74\%) exceeded the favorable rate for district secondary schools (71\%). Favorable response rates by question by campus for all 2017-18 Student Experience Survey
questions are provided in Appendix $P$, including changes in favorable response rates for each question from 2016-17.

Table 11: 2018 ACE Student Experience Survey Percent Favorable Ratings by Category

|  | $\begin{gathered} \hline \text { Classroom } \\ \text { Environment } \\ \% \\ \hline \end{gathered}$ | Expectations and Rigor \% | Pedagogical Effectiveness \% | Student Engagement $\%$ | $\qquad$ | Overall \% |

| Dist Elem | 81 | 89 | 91 | 85 | 76 | 84 |
| Distr Sec | 80 | 77 | 75 | 57 | 67 | 71 |

Source: Data provided by the Office of Institutional Research dated June 5, 2018.
Note: Favorable percentages that met or exceeded the district for grade level are in blue bold. ACE Elem = ACE elementary schools. Dist Elem = District elementary schools. ACE Sec = ACE secondary schools. Dist Sec = District secondary schools. Elementary averages include students in grades three to five. Secondary averages include students in grades six to 12.

Changes in student perceptions over time also were generally positive. One-, two-, and three-year changes in overall positive student ratings are shown in Table 12. Overall, 2017-18 ACE elementary school and middle school campuses remained within one point of favorable response rates from the previous year. For ACE 1.0, three elementary school campuses (Blanton, U. Lee, Pease) and all middle school campuses exceeded, met, or came within one percentage point of favorable response rates from the previous year. All ACE 2.0 campuses exceeded favorable rates from the previous year (range: +3 to +13 percentage points). Since program inception, all but one ACE 1.0 elementary school campus (Mills), all ACE 1.0 middle school campuses, and ACE elementary school and middle school campuses overall maintained three-year improvements in overall favorable student responses. These results are an indicator of the continued improvement of campus culture over time on most ACE campuses.

Table 12: 2015 to 2018 ACE Student Experience Survey Overall Favorable Ratings

|  | $\begin{gathered} 2015 \\ \% \end{gathered}$ | $\begin{gathered} 2016 \\ \% \end{gathered}$ | $\begin{gathered} 2017 \\ \% \end{gathered}$ | $\begin{gathered} 2018 \\ \% \end{gathered}$ | $\begin{aligned} & 1 \mathrm{Yr} \Delta \\ & \% \text { Pts } \end{aligned}$ | $\begin{aligned} & 2 \mathrm{Yr} \Delta \\ & \% \text { Pts } \end{aligned}$ | $\begin{aligned} & \hline 3 \text { Yr } \Delta \\ & \text { \% Pts } \\ & \hline \end{aligned}$ |

Source: Campus-level Student Experience Survey reports from program office on May 27, 2016 (2015 and 2016) and June 13, 2017 (2017) and district data dated June 7, 2016 (2015 and 2016), May 24, 2017 (2017) and June 5, 2018 (2018).
Note: Favorable percentages that met or exceeded the district for grade level (elementary or secondary) are in blue bold. Elementary averages include students in grades three to five. Secondary averages include students in grades six to 12. a2016-17 (pre-ACE) favorable rate for Carr is comprised of the simple average of favorable rates for both Carr and Carver because campuses were combined in 2017-18. $1 \mathrm{Yr} \Delta=$ difference from 2017 to 2018. $2 \mathrm{Yr} \Delta=$ difference from 2016 to 2018. $3 \mathrm{Yr} \Delta=$ difference from 2015 to 2018.

## Parent Perception Survey

Parent perceptions of ACE campuses were generally positive. As shown in Figure 22, average overall positive parent response rates on ACE campuses ranged from 73 percent (Edison) to 93 percent (Blanton). Four ACE campuses met the 2017-18 ACE objective by exceeding the district positive response rate of 90 percent (Blanton, U. Lee, Mills, Titche).

Overall, ACE campuses showed growth in parent perceptions over time. Appendix $Q$ includes one-, two-, and three-year average positive response rate trends on the Parent/Guardian Survey, as applicable. Positive response rates trended upward for all but one campus (Carr) from the previous year. ${ }^{32}$ All ACE 1.0 campuses maintained growth in parent perceptions over the three years of the program. Notably, U. Lee (+15 percentage points), Dade (+15 percentage points), and Zumwalt (+22 percentage points) experienced the strongest gains in positive parent/guardian perceptions since 2015.

[^12]Figure 22: 2018 ACE Campus Parent/Guardian Survey Overall Positive Response Rates

Source: District PEI Parent Survey files dated July 18, 2018.
Note: * $=$ response rates denote sample sizes that were below validity requirements; results for these campuses should be reviewed with caution.

## What were the 2018 ACE state accountability ratings?

The ultimate goal of the ACE program was to improve or maintain the Met Standard status of all ACE campuses. Details regarding the establishment and calculation of TEA accountability targets and indices are complex and beyond the scope of this document. ${ }^{33}$ In the previous two years, six of the seven ACE 1.0 campuses achieved a Met Standard rating following program participation. In 2018, six of seven ACE 1.0 campuses earned a Met Standard rating, with the one formerly Improvement Required campus earning a Met Standard rating (Edison), and one formerly Met Standard campus falling to Improvement Required (Pease). Following one year of ACE participation, all ACE 2.0 campuses improved their ratings from Improvement Required to Met Standard. These findings are the strongest indicator of sustained academic improvement resulting from the ACE program.

## SUMMARY AND RECOMMENDATIONS

## Summary

Established in 2015-16, ACE offered competitive stipends to incentivize top teachers and principals to relocate to some of the district's most challenged campuses. The first group of campuses (ACE 1.0) continued for year three of the program in 2017-18 and includes four elementary schools (Annie Web

[^13]Blanton, Umphrey Lee, Roger Q. Mills, and Elisha M. Pease) and three middle schools (Billy Earl Dade, Thomas A. Edison, and Sarah Zumwalt). A new cohort of ACE campuses (ACE 2.0) completed their first year in the program in 2017-18 and included five elementary schools (C.F. Carr, J.N. Ervin, Onesimo Hernandez, L.W. Ray, and Edward Titche) and one middle school (Thomas J. Rusk). The ACE program aimed to improve student achievement by striving to accelerate growth in three general areas: people, learning, and expectations. This evaluation covered progress toward outcomes related to these components in 2017-18, the third year of the program.

## ACE Implementation

The ACE program was supported by $\$ 9,885,862$ of the Dallas ISD general operating funds. Most of the budget was allocated to annual stipends for teachers and campus leadership ranging from \$8,000 to $\$ 15,000$, depending on role, and, in the case of the teachers, TEI effectiveness rating.

Although the ACE program was primarily about placing the most effective leaders and teachers at campuses, several additional elements were common for all, such as common assessment and tracking tools, supplemental professional development, facilities upgrades, uniform provision, and regular team walks and coaching sessions with program leadership. An extra hour was embedded into the master schedule at all ACE campuses, and campuses remained open two to three days a week for extra student help and extracurricular activities. For every 300 students, all ACE campuses received an additional assistant principal, counselor, and campus instructional coach. Class size was also capped at 22 students. Generally, ACE program implementation remained consistent over the first three years.

## ACE Student, Teacher, and Principal Characteristics

About half of the 6,966 ACE students were male (51\%) and/or African American (54\%), and most were economically disadvantaged (86\%). Almost a third were English language learners (ELLs; 32\%) and $10 \%$ were enrolled in special education. Student characteristics were comparable for both ACE cohorts.

The 462 ACE teachers were 76 percent female, 58 percent African American, 23 percent Hispanic, and 16 percent white. Almost a third (29\%) of ACE teachers held at least a master's degree, and ACE teachers taught in the Dallas ISD for an average of 7.5 years, with 46 percent teaching in the Dallas ISD for six or more years. The two cohorts were composed slightly differently with respect to ethnicity, but were comparable with respect to degrees earned and district tenure.

The 13 ACE principals were 54 percent female, 69 percent African American, and 23 percent Hispanic. Most principals held at least a master's degree (85\%). ACE principals worked for the Dallas ISD for an average of 11.8 years, with 46 percent employed by the district for at least 15 years. Assigned ACE principals remained consistent throughout the academic year.

## ACE Teacher and Campus Leadership Perceptions

The evaluator administered online surveys to collect feedback from ACE campus administrators (principals and assistant principals; 78\% response rate) and teachers ( $69 \%$ response rate), summarizing quantitative data responses using frequency analyses and open-ended data using content analysis.

## Campus Leadership

Campus administrators generally expressed satisfaction with respect to year three of the ACE program and most rated support from the ACE core program team as excellent or very good ( $88 \%$ ). Of five core ACE elements implemented on their campuses, administrators most highly rated the effectiveness of data analysis and PLC ( $84 \%$ ) and consistency of policies/systems/structures ( $80 \%$ ), and were most likely to indicate that balanced literacy efforts (47\%) required further development. These findings were corroborated by open-ended responses, such that more respondents considered campus culture, data analysis, and balanced literacy to be both among their greatest successes ( $54 \%, 49 \%, 17 \%$, respectively) and greatest challenges ( $37 \%, 10 \%$, $39 \%$, respectively) in 2017-18. Administrators most frequently indicated improved behavioral management support ( $20 \%$ ) and more parent involvement ( $20 \%$ ) were the most important potential changes that could improve future ACE success. Campus administrators also offered several parent and community partnership opportunities on their campuses in efforts to bolster engagement.

## Teachers

ACE teacher perceptions were generally positive. Of five core ACE elements implemented on their campuses, teachers most highly rated the effectiveness of instructional rigor (74\%), data analysis and PLC (72\%), and balanced literacy (71\%), and were most likely to indicate that school culture (44\%) required further development. Teachers were less likely than administrators to reach consensus with responses to open-ended questions, such that the highest (though relatively low) rate of teachers mentioned factors related to data analysis among their greatest accomplishments ( $15 \%$ ) and factors related to school culture among their greatest challenges (12\%). In support of opinions expressed with respect to school culture, teachers most frequently indicated improved behavioral management support (32\%) as the most important potential change that could improve future ACE success. Despite teachers generally agreeing that campus leadership offered additional opportunities for parent involvement than on non-ACE campuses (67\%), less than half of teachers (48\%) agreed that parents were engaged in the progress of their students in 2017-18. Most teachers (67\%) were satisfied that the stipend compensated them for the extra effort required of an ACE teacher.

## People Component Outcomes

To examine outcomes related to the people component of ACE, the evaluator examined teacher retention, TEI effectiveness levels, average spot observation scores, and district Climate Survey results.

## Teacher Retention

ACE 1.0 campus teacher retention rates ranged from 44 percent (Pease) to 83 percent (Blanton, Zumwalt) with an overall ACE 1.0 teacher retention rate of 70 percent. Although overall the ACE 1.0 campuses did not meet the objective of meeting or exceeding the districtwide retention rate (73\%), three campuses (Blanton, U. Lee, Zumwalt) exceeded the district retention rate, and an additional two campuses (Mills, Dade) retained over 70 percent of teachers from the previous year.

## Proficient or Higher TEl Effectiveness Levels

Four of the seven ACE 1.0 (Blanton, U. Lee, Mills, Zumwalt) and five of the six ACE 2.0 (Carr, Ervin, Hernandez, Ray, Titche) campuses, and ACE 1.0, ACE 2.0, and ACE overall met the 2017-18 objective of attaining a minimum of 60 percent of teachers at campuses with at least a Proficient I TEI effectiveness level. Generally, this objective appeared more difficult to attain at the middle school level than at the elementary school level.

## Spot Observations

The ACE objective was to attain high percentages (fall: 60\%; spring: 75\%) of proficient teachers as measured by average TEI spot observation scores on standards 2.3 (clear instruction) and 2.4 (instructional rigor). In general, ACE teachers earned higher ratings for clear instruction than for instructional rigor both in the fall and in the spring.

In fall 2017, four elementary school campuses (Blanton, U. Lee, Ervin, Titche) and one middle school campus (Zumwalt) met or exceeded the 60 percent fall threshold for clear instruction, and two elementary school campuses (U. Lee, Ervin) and one middle school campus (Zumwalt) met or exceeded this threshold for instructional rigor. ACE 1.0, ACE 2.0, and ACE overall did not meet the fall 2017 objective for proficient spot observations for clear instruction or instructional rigor.

In spring 2018, eight ACE elementary school campuses (Blanton, U. Lee, Mills, Carr, Ervin, Hernandez, Ray, Titche) and three ACE middle school campuses (Dade, Edison, Zumwalt) met or exceeded the 75 percent spring threshold for clear instruction. Five elementary school campuses (U. Lee, Carr, Ervin, Ray, Titche) and two middle school campuses (Dade, Zumwalt) met or exceeded this threshold for instructional rigor. ACE 1.0, ACE 2.0, and ACE overall met the spring 2018 objective for clear instruction, but the ACE 1.0, ACE 2.0, and ACE campuses overall missed the 75 percent objective for instructional rigor.

## Climate Survey

In fall 2017, one ACE 1.0 campus (U. Lee) and four ACE 2.0 campuses (Carr, Hernandez, Ray, Titche) met the 2017-18 objective of attaining scores in the fourth or fifth quintiles (most positive) on the Culture of Feedback and Support section of the district Climate Survey. Except for Hernandez, these same campuses also achieved the fourth or fifth quintile scores in spring 2018.

## Learning Component Outcomes

To examine outcomes related to the learning component of ACE, the evaluator examined Istation Indicators of Progress (ISIP) Tier 1 (grade level reading) rates (each six-week period and end of year), Assessment of Course Performance (ACP) passing rates (fall and spring), and State of Texas Assessments of Academic Readiness (STAAR) performance standard attainment rates (spring).

ACE overall rates of students reading on grade level trended upward most six-week periods from the start (BOY) to the end of the year (EOY) for all grade levels. In most cases, ACE 1.0 campuses increased the extent to which rates of students reading on grade level (Tier 1) exceeded the district. ACE
2.0 rates of Tier 1 students did not consistently exceed the district, especially in English, but those that fell short of district rates clearly narrowed the gaps with district rates by the end of the year.

At the end of the year (EOY), ACE campuses overall met the objective of meeting or exceeding district rates of students reading at grade level for kindergarten to grade two in Spanish and in combined English and Spanish. For English alone, ACE campuses overall met this objective in kindergarten, but not for grade one or grade two. ACE 1.0 campuses met or exceeded the district in all versions in all grades, but ACE 2.0 campuses fell short of this goal for grade one and grade two, primarily because of performance on the English version of the assessment.

For 2017-18, one-year changes in ACE Tier 1 attainment rates on all versions of $I S I P$ were stronger than for ISN and for the district. As expected, this pattern was particularly true for ACE 2.0 campuses in their first year of ACE implementation. For the ACE 1.0 cohort, longitudinal results reflect sustained accelerated achievement in reading on grade level for kindergarten to grade two overall, despite smaller year-over-year gains in years two and three of the ACE program. ACE 1.0 growth in 2017-18 adds to the extensive growth in Tier 1 attainment over the first two years of the program. ACE 1.0 two-year trends also exceeded district growth across the board. As the strongest evidence of literacy growth for ACE students, not only did three-year growth in Tier 1 attainment for ACE 1.0 students in all grades far exceed the district in English, Spanish, and combined English and Spanish, but this three-year growth ranged from +32.0 percentage points (kindergarten Spanish) to +45.1 percentage points (grade two English).
ACP
ACP passing rates for ACE overall exceeded the previous year on 39 ( $80 \%$ ) of the 49 exams administered on ACE campuses in the fall, and on six (75\%) of the eight exams administered in the spring. As expected, these rates were particularly strong for ACE 2.0 campuses after their first year of the program. In addition, ACE students overall met the objective of $A C P$ passing rates at least within 10 percentage points of district rates on 38 ( $78 \%$ ) of 49 ACPs in the fall and on three ( $38 \%$ ) of the eight spring exams. This success rate was virtually the same for ACE 1.0 and ACE 2.0 in the fall, but was particularly strong for ACE 2.0 campuses compared to ACE 1.0 campuses in the spring.

## STAAR

ACE students overall met the 2017-18 ACE objective of achieving STAAR performance standard attainment rates at least within 10 percentage points of the district for all subjects at the Approaches+, Meets+, and Masters level. This finding was true for ACE 1.0 and 2.0, except for ACE 1.0 reading, which came a few points short of meeting this objective. Notably, ACE 2.0 social studies slightly exceeded district passing rates for all three performance standards.

With few exceptions, ACE STAAR passing rates increased over one year across the board in all subjects for all performance standards. Generally, this one-year growth was strongest for mathematics and social studies, especially for ACE 2.0, an expected outcome in the first year of the program. Two- and three- year changes in STAAR performance standard attainment for ACE 1.0 campuses were mostly positive. The strongest overall three-year percentage point gains for ACE 1.0 campuses emerged in
mathematics (+34) and social studies (+28) at the Approaches+ level, in mathematics (+30), writing (+19), and science (+19) at the Meets+ level, and mathematics (+15) at the Masters level. These three-year results are a testament to the ongoing impact of ACE implementation on these original ACE campuses.

On the exam level, in 2017-18 STAAR passing rates exceeded 2016-17 on all STAAR subtests (100\%) administered on ACE campuses at both the Approaches+ and Meets+ performance standards. Considered separately, both ACE cohorts performed exceptionally well, with ACE 1.0 campuses exceeding last year on 83 percent of exams at the Approaches+ level and 78 percent of exams at the Meets+ level, and ACE 2.0 campuses exceeding last year on 94 percent of exams at the Approaches+ level and 100 percent of exams at the Meets+ level. ACE students overall met the objective of performance standard attainment within 10 percentage points of district rates on 15 (83\%) of 18 STAAR exams at the Approaches+ performance standard and on $12(67 \%)$ of the 18 STAAR exams at the Meets+ level. This success rate was slightly higher for ACE 2.0 than for ACE 1.0, as expected, but both cohorts achieved the STAAR objective for 2017-18 on a majority of the tests administered (range: $61 \%$ to $83 \%$ ).

## Expectations Component Outcomes

To examine outcomes related to the expectations component of ACE, the evaluator examined disciplinary offenses, attendance rates, Student Experience Survey results, and Parent/Guardian Survey results.

## Disciplinary Offenses

ACE campuses generally demonstrated tremendous progress in disciplinary referral reduction. For 2017-18, six of 13 campuses met the ACE objective of reporting level I, II, and III disciplinary referrals at or below district rates. ACE 1.0 elementary school and middle school campuses overall and the ACE 2.0 middle school also met this objective. Overall, ACE 1.0 reduced total offenses by 89 (15\%) in one year, contributing to a three-year reduction of 3,391 ( $87 \%$ ) referrals. ACE 2.0 campuses mirrored ACE 1.0 success by reducing total offenses by $1,218(77 \%)$ in the first year of the program.

## Attendance Rates

Four ACE elementary school campuses (Blanton, U. Lee, Ervin, Titche) and one middle school campus (Rusk) met the 2017-18 ACE objective of attendance rates of at least 96 percent for 2017-18. Overall, ACE attendance rates (95\%) for the current year were comparable to district rates (95\%). On the cohort level, although ACE 1.0 overall attendance did not meet the 2017-18 attendance objective, ACE 2.0 finished the year meeting the 96 percent attendance objective.

## Student Experience Survey

ACE students generally responded favorably on the districtwide student survey. Five ACE elementary school campuses (Blanton: 95\%; U. Lee: 90\%; Carr: 85\%; Hernandez: 86\%; Titche: 91\%) and ACE elementary schools overall (87\%) met the 2017-18 objective and exceeded the district elementary school favorable rate of 84 percent. Three ACE middle school campuses (Dade: 74\%; Zumwalt: 81\%; Rusk: $75 \%$ ) and ACE middle schools overall (74\%) also exceeded the favorable rate for district secondary schools (71\%).

Changes in student perceptions over time also were generally positive. Overall, 2017-18 ACE elementary school and middle school campuses remained within one point of favorable response rates from the previous year. For ACE 1.0, three elementary school campuses (Blanton, U. Lee, Pease) and all middle school campuses exceeded, met, or came within one percentage point of favorable response rates from the previous year. All ACE 2.0 campuses exceeded favorable rates from the previous year (range: +3 to +13 percentage points). Since program inception, all but one ACE 1.0 elementary school campus (Mills), all ACE 1.0 middle schools, and ACE elementary schools and middle schools overall maintained three-year improvements in overall favorable student response. These results are an indicator of the continued improvement of campus culture over time on most ACE campuses.

## Parent/Guardian Survey

Parent perceptions of ACE campuses, as measured by the PEI Parent/Guardian Survey, were generally positive. Average overall positive parent response rates on ACE campuses ranged from 73 percent (Edison) to 93 percent (Blanton). Four ACE campuses met the 2017-18 ACE objective by exceeding the district positive response rate of 90 percent (Blanton, U. Lee, Mills, Titche). Overall

The ultimate test of program success designed to boost achievement for Improvement Required campuses is earning a Met Standard rating as the result of implementation. All ACE campuses earned a Met Standard rating in 2017-18.

## Recommendations

In 2018-19, six of seven ACE 1.0 campuses will transition from the program with some campus support, the remaining ACE 2.0 campuses will continue in the second year of the program, and one ACE 1.0 campus will join a third cohort (ACE 3.0) participating in a modified program that will focus more heavily on development of campus leadership and teacher development. The following recommendations are offered in the context of these program changes.

- Carefully monitor transitioning campuses. As most ACE 1.0 campuses transition out of the ACE program and campuses join the new ACE 3.0 hybrid program, monitoring ongoing progress on these campuses will be important for evaluating maintenance of gains on former campuses and ensuring success of new campuses in the first year of the revised hybrid program. Information collected from such monitoring will be invaluable for shaping future elements of programs that target school improvement.
- Continue professional development to support campus leaders and teachers. Effective administrators and teachers were the cornerstone of ACE successes. Therefore, they should continue to have the resources and professional development opportunities they need to lead and teach effectively. The one ACE campus that missed earning a Met Standard accountability rating this year (Pease) did not have an official principal for much of the year and was the elementary school campus with the lowest rate of proficient teachers, as measured by TEI effectiveness levels. Expanding the pool
of available effective campus leaders and teachers and retaining those who are already highly effective will be critical as the program transitions to the next phase.
- Heighten focus on literacy. Although not unique to ACE students, achievement and growth in reading and writing were generally weaker than for other subjects, especially mathematics. ACE campuses should continue to focus on improving literacy at all grade levels to reduce this discrepancy.
- Continue to maintain and expand training and support for behavioral management in the classroom. Although there was both quantitative (decreased discipline referrals) and anecdotal (stakeholder perceptions) evidence that behavioral management improved on ACE campuses since program inception, teachers indicated that some improvement remained necessary. In addition, favorable response rates on the Student Experience Survey improved and were stronger than the district for most ACE campuses, indicating improved student perceptions of the academic environment. The extent to which positive improvements in behavioral management translated to academic achievement should be considered in future program decisions regarding campus systems and structures.
- Continue efforts to strengthen parent involvement. Despite extensive evidence of expanded encouragement of parent involvement, barely half of teachers and sixty percent of campus leaders agreed that ACE parents were engaged with student progress in 2017-18. Attendance rate challenges on some campuses also support the notion that engaging parents may remain a challenge at ACE campuses. Stronger partnership with parents of ACE students will assist with improving and maintaining gains in important outcomes, such as discipline enforcement, attendance rates, and dedication to learning. Leadership should continue its strong efforts to increase interest, pride, and involvement from parents of ACE campuses.
- Prepare to evaluate long-term outcomes. It will be important to evaluate long-term success as students move from ACE elementary school and middle school campuses into higher grades at other campuses. Dosage of years enrolled on ACE campuses and comparisons to similar students who were not enrolled on ACE campuses should be examined for long-term achievement outcomes like assessments, graduation rates, college and career readiness, college enrollment, and other factors to determine the lasting benefit of ACE participation. Planning how long-term outcomes will be studied early in the program will increase the likelihood that the appropriate data and circumstances are in place for future evaluation.

## APPENDICES

## Appendix A

## 2017-18 Intensive Support Network (ISN) Campuses

The following campuses were ISN campuses in 2017-18 and were used as a comparison group for several analyses in this evaluation.

Lincoln High School and Communications/Humanities Magnet
South Oak Cliff High School
James Madison High School
T. W. Browne Middle School

Oliver W. Holmes Middle School
Boude Storey Middle School
John Neely Bryan Elementary School
Rufus C. Burleson Elementary School
Martin Luther King, Jr. Elementary School
Paul L. Dunbar Elementary School
Joseph J. Rhoads Elementary School
Charles Rice Elementary School
Oran M. Roberts Elementary School
George W. Truett Elementary School
Daniel Webster Elementary School

Note: As appropriate, subsets of these campuses were used for comparison purposes. For example, ISN comparison groups were restricted to the elementary school or middle school campuses on this list when results are grouped by grade level.

Source: STAAR files dated September 1, 2015 (2015 grades three to eight), August 11, 2015 (2015 Algebra EOC), July 11, 2016 (2016 grades three to eight), July 12, 2016 (2016 Algebra I EOC), June 15, 2017 (2017 grades three to eight), June 22, 2017 (2017 Algebra I EOC), and June 20, 2018 (2018 STAAR and Algebra I EOC) for students enrolled on the PEIMS snapshot day for the respective year.
Note: Appr+ = attained Approaches Grade Level or Higher performance standard. Rates include scores for the first and second administrations of all versions of STAAR. Although all scores are included, some test scores may have been adversely affected by online testing issues. ${ }^{a}=$ Prior to 2017, Approaches+ was called Level II: Satisfactory Academic Performance. ${ }^{\text {b }}=$ Cut scores increased slightly in 2016; comparisons to 2015 STAAR results should be reviewed with caution. * = Because Carr and Carver merged in 2017-18, 2016-17 rates for Carr include both Carr and Carver; rates for 2017-18 are for Carr only. ACE 2.0 campuses were not part of the program prior to 2017-18; only one year of comparison is valid. ISN = Intensive Support Network (see Appendix A). $\Delta=$ difference. $\mathrm{Yr}=$ year. \%pts = percentage points. $\mathrm{N} / \mathrm{A}=$ not applicable.

Appendix L Table 2: 2015 to 2018 ACE STAAR Rates at Meets Grade Level or Above Standard by Grade Level and Campus - Mathematics

Source: STAAR files dated September 1, 2015 (2015 grades three to eight), August 11, 2015 (2015 Algebra EOC), July 11, 2016 (2016 grades three to eight), July 12, 2016 (2016 Algebra I EOC), June 15, 2017 (2017 grades three to eight), June 22, 2017 (2017 Algebra I EOC), and June 20, 2018 ( 2018 STAAR and Algebra I EOC) for students enrolled on the PEIMS snapshot day for the respective year.
Note: Meets+ = attained Meets Grade Level or Higher performance standard. Rates include scores for the first and second administrations of all versions for all tests. Alternate-2 test takers are not evaluated on the Meets+ standard. Although all scores are included, some test scores may have been adversely affected by online testing issues. ${ }^{\text {a }}=$ Prior to 2017, Meets+ was called Final Level II. ${ }^{\text {b }}=$ Cut scores increased slightly in 2016; comparisons to 2015 STAAR results should be reviewed with caution. * = Because Carr and Carver merged in 2017-18, 2016-17 rates for Carr include both Carr and Carver; rates for 2017-18 are for Carr only. ACE 2.0 campuses were not part of the program prior to 2017-18; only one year of comparison is valid. ISN = Intensive Support Network (see Appendix A). $\Delta=$ difference. $\mathrm{Yr}=$ year. $\%$ pts $=$ percentage points. $\mathrm{N} / \mathrm{A}=$ not applicable.

Appendix L Table 3: 2015 to 2018 ACE STAAR Rates of Students at Masters Grade Level Standard by Grade Level and Campus - Mathematics

Source: STAAR files dated September 1, 2015 (2015), July 11, 2016 (2016), June 15, 2017 (2017), and June 20, 2018 (2018) for students enrolled on the PEIMS snapshot day for the respective year.
Note: Meets+ = attained Meets Grade Level or Higher performance standard. Rates include scores for the first and second administrations of all versions of STAAR. Alternate-2 test takers are not evaluated on the Meets+ standard. Although all scores are included, some test scores may have been adversely affected by online testing issues. ${ }^{a}=$ Prior to 2017 , Meets + was called Final Level II. ${ }^{b}=$ Cut scores increased slightly in 2016; comparisons to 2015 STAAR results should be reviewed with caution. * = Because Carr and Carver merged in 2017-18, 2016-17 rates for Carr include both Carr and Carver; rates for 2017-18 are for Carr only. ACE 2.0 campuses were not part of the program prior to 2017-18; only one year of comparison is valid. ISN $=$ Intensive Support Network (see Appendix A). $\Delta=$ difference. Yr $=$ year. \%pts = percentage points. N/A = not applicable.

Source: STAAR files dated September 1, 2015 (2015), July 11, 2016 (2016), June 15, 2017 (2017), and June 20, 2018 (2018) for students enrolled on the PEIMS snapshot day for the respective year.
Note: Masters = attained Masters Grade Level performance standard. Rates include scores for the first and second administrations of all versions of STAAR. Although all scores are included, some test scores may have been adversely affected by online testing issues. ${ }^{\text {a }}=$ Prior to 2017, Masters was called Level III: Advanced Academic Performance. ${ }^{b}=$ Cut scores increased slightly in 2016; comparisons to 2015 STAAR results should be reviewed with caution. * = Because Carr and Carver merged in 2017-18, 2016-17 rates for Carr include both Carr and Carver; rates for 2017-18 are for Carr only. ACE 2.0 campuses were not part of the program prior to 2017-18; only one year of comparison is valid. ISN = Intensive Support Network (see Appendix A). $\Delta=$ difference. $\mathrm{Yr}=$ year. \%pts = percentage points. N/A = not applicable.

Source: STAAR files dated June 15, 2017 (2017 grades three to eight), June 22, 2017 (2017 Algebra I EOC), June 20, 2018 (2018 STAAR and Algebra I EOC) for students enrolled on the PEIMS snapshot day for the respective year.
Note: Appr+ = attained Approaches Grade Level or Higher performance standard. Rates include scores for the first and second administrations of all versions of STAAR. Although all scores are included, some test scores may have been adversely affected by online testing issues. ISN = Intensive Support Network (see Appendix A). $\Delta=$ difference. $\mathrm{Yr}=\mathrm{year}$.
\%pts = percentage points. N/A = not applicable. Af Amer = African American. ELL = English language learner. Eco Dis = economically disadvantaged. Spec Ed = special education.

* $=$ fewer than five students took test. - = zero students took test.

Source: District PEI Parent/Guardian Survey data files dated July 16, 2018.
Note: $\mathrm{Yr}=$ year. $\Delta=$ Change. \%pts = percentage points. ${ }^{\text {a }}=$ Carr and Carver merged in 2017-18, 2017 numbers include the sum of respondents for Carr and Carver and the simple average of positive response rates for both schools. Italicized 2018 response rates denote sample sizes that were below validity requirements; results for these campuses should be reviewed with caution. To allow comparison across years, calculations shown are for the 10 questions included each year since 2015.

## Parent/Guardian Survey Questions (10 Items)

- I believe what my child learned this year is what he or she needed to learn to be ready for the next grade.
- My child's school has a respectful learning environment.
- My child's school has a safe learning environment.
- I am satisfied with the school's maintenance and cleanliness.
- My child's school informs me about my child's grades and learning progress throughout the year.
- My child's school welcomes parent involvement and engagement.
- My child's school responds to my concerns in a timely manner.
- I feel comfortable interacting with school personnel (teachers and administrators).
- My child's school stresses the importance of preparing for/attending college after high school.
- I am satisfied with the direction and the success of my child's school.

[^0]:    ${ }^{1}$ For ACE 1.0 middle school campuses and all ACE 2.0 campuses, after school opportunities were offered three days per week. For ACE 1.0 elementary school campuses, after school opportunities were offered two days per week.

[^1]:    ${ }^{2}$ Pease operated without an assigned principal until mid-spring 2018. Pease principal demographics are included for completeness.

[^2]:    ${ }^{3}$ Of the 462 invitations sent to teachers, one email address bounced and five teachers previously opted out of district surveys. The remaining 456 teachers received invitations to the survey.
    ${ }^{4}$ Percentages do not include respondents who indicated that a question was not applicable or that they did not know or were not sure how to answer a question.
    ${ }^{5}$ A total of 24 (58.5\%) administrator respondents fully completed the survey, and eight (19.5\%) partially completed the survey. Tables in Appendix D include the number of respondents by question.
    ${ }^{6}$ All but one of the respondents who reported working in campus leadership in the previous year were employed as a principal or assistant principal in the Dallas ISD in the previous year.

[^3]:    ${ }^{7}$ Frequency rates shown do not include respondents who indicated that a question was not applicable or that they did not know or were not sure how to answer a question.
    ${ }^{8}$ A total of 261 ( $82 \%$ ) teacher respondents fully completed the survey, and 56 ( $18 \%$ ) partially completed the survey. Tables in Appendix E include the number of responses by question.

[^4]:    ${ }^{9}$ A quintile is any of five equal groups into which a population can be divided according to the distribution of values of a particular variable.
    ${ }^{10}$ Data Analytics and Control is a department in Human Capital Management.
    ${ }^{11}$ Leavers included those who left the district and those who moved to non-instructional roles in the district.
    ${ }^{12}$ TEl ratings for the 2016-17 academic year are in effect for the 2017-18 academic year.

[^5]:    ${ }^{13}$ Spot observations with a "completed" status were included in calculations; average spot observation scores of 2.0 or higher were considered "proficient."
    ${ }^{14}$ For more information on the Climate Survey, see Weir, 2018.

[^6]:    ${ }^{15}$ ISIP testing period windows for 2014-15 to 2017-18 are provided in Appendix H.
    ${ }^{16}$ Comparisons between the English and Spanish versions of ISIP are not recommended because the two versions are normed differently. Therefore, the percentage of students at or above the $40^{\text {th }}$ percentile (which indicates performing at grade level) was used.
    ${ }^{17}$ Staff members from Evaluation and Assessment, Early Childhood and Community Partnerships, and Bilingual/ESL worked together to develop ISIP data analysis guidelines. The purpose was to ensure consistent ISIP reporting across departments and over time.
    ${ }^{18}$ 2014-15 files (updated) were dated June 17, 2016. Note: 2014-15 ISIP data were not pulled in six-week increments. 2015-16 files were dated June 21, 2016 (SW3 to SW6, MOY, and EOY), January 31, 2017 (BOY), and February 6, 2017 (SW1 and SW2). 2016-17 files were dated October 5, 2016 (SW1). November 8, 2016 (SW2), January 10, 2017 (SW3), February 28, 2017 (SW4), April 17, 2017 (SW5), May 30, 2017 (SW6). October 18, 2016 (BOY), February 16, 2017 (MOY), and May 30, 2017 (EOY). 2017-18 files were dated October 10, 2017 (SW1). November 8, 2017 (SW2), January 9, 2018 (SW3), March 1, 2018 (SW4), April 16, 2018 (SW5), June 3, 2018 (SW6). November 1, 2018 (BOY), February 5, 2018 (MOY), and June 3, 2018 (EOY).
    ${ }^{19}$ PEIMS dates: October 31, 2014 (2014-15), October 30, 2015 (2015-16), October 28, 2016 (2016-17), or October 27, 2017 (2017-18)
    ${ }^{20}$ For more information on ACP exams, see Williams-Palmer (2018).
    ${ }^{21}$ Prior to 2016-17, ACP exams were administered in most subjects in kindergarten to grade 12, but the number of $A C P s$ decreased in recent years. Since 2016-17, fall elementary school $A C P$ exams included only reading and mathematics in kindergarten through grade five, plus grade four language arts and grade five science exams. The district eliminated all spring 2017 and spring 2018 elementary school exams. Secondary school spring 2017 and spring 2018 ACPs were eliminated if corresponding STAAR exams existed. For middle school students (the highest grade level applicable to ACE) this reduction resulted in ACPs limited to science (except for grade eight) and social studies.

[^7]:    ${ }^{22}$ Because ACP exams are scaled each year based upon the current year's results, readers should exercise caution when comparing year-to-year results. One-year passing rate comparisons are provided for informational purposes only.
    ${ }^{23}$ More information on STAAR performance standards: http://tea.texas.gov/student.assessment/staar/performance-standards/
    ${ }^{24}$ Although cutoff points did not change, naming conventions for performance standards changed in 2017. Naming conventions for years prior to 2017 are as follows: Did Not Meet Grade Level (formerly Level I: Unsatisfactory Academic Performance); Approaches Grade Level (formerly Level II: Satisfactory Academic Performance); Meets Grade Level (formerly Final Level II); and Masters Grade Level (formerly Level III: Advanced Academic Performance). For simplicity, in this document each cutoff point will be referenced using the most recent naming standard.
    ${ }^{25}$ To provide context for past STAAR changes and to understand their implications for interpretation of some results (particularly for three-year ACE 1.0 trends) in this evaluation report, it is important to review a brief history. Originally implemented in the first year of STAAR (spring 2012), the Texas Education Agency (TEA) established a plan for four years of performance standard stability, followed by a phase-in to the final recommended standard. This phased plan incorporated large jumps to more rigorous performance standards every few years. In the 2015-16 academic year, the TEA revised this plan to an approach of smaller, predictable increases every year until reaching the final recommended standard in 2021-22. The first planned small increase occurred in 2016, but in 2017 the TEA abandoned the phase-in approach altogether, opting for a single increase to the Meets Grade Level or Above (formally called Final Recommended) standard in 2021-22. The standards for 2017 did not change from 2016, except in nomenclature.

[^8]:    ${ }^{26}$ For example, in 2017 STAAR writing exams (grades four and seven) shortened from a two-day to a one-day assessment, and exams for grades three to eight were shortened from previous years.
    ${ }^{27} 2015$ files were dated September 1, 2015 (grades three to eight) and August 11, 2015 (Algebra I EOC). 2016 files were dated July 11,2016 (grades three to eight) and July 12, 2016 (Algebra I EOC). 2017 files were dated June 15, 2017 (grades three to eight) and June 22, 2017 (Algebra I EOC). 2017-18 files were dated June 20, 2018 (STAAR and Algebra I EOC).
    ${ }^{28}$ PEIMS snapshot dates: October 31, 2014 (2014-15); October 30, 2015 (2015-16); October 28, 2016 (2016-17), October 27, 2017 (2017-18).

[^9]:    ${ }^{29}$ For more information on the Student Experience Survey, see (Singapuri, 2018). In 2014-15, the Student Experience Survey was called the Student Perception Survey.
    ${ }^{30}$ Aggregated results were reported separately for elementary and secondary school levels.

[^11]:    Source: District discipline files dated August 5, 2015 (2014-15), July 13, 2016 (2015-16), July 10, 2017 (2016-17), and July 19, 2018 (2017-18). Note: Because Carr and Carver merged in 2017-18, 2016-17 numbers for Carr include both Carr and Carver; 2017-18 numbers are for Carr only.

[^12]:    ${ }^{32}$ Reduced favorable response rates at Carr should be reviewed with extreme caution because 2017 baseline rates were combined with Carver because of the merge of Carr and Carver into one campus in 2018. Comparisons are shown for informational purposes only.
